## **INSTRUCTIONS TO COMBINE DRUG AND ALCOHOL TESTING PROGRAMS**

A part 119 certificate holder with authority to operate under part 121 or part 135 that also conducts commercial air tour operations (as defined in § 91.147) may choose to combine its U.S. DOT drug and alcohol testing programs, as described in 14 CFR §§ 120.117 and 120.225. To do so, the operator must contact its FAA Principal Operations Inspector (POI) and advise that all safety-sensitive employees will be included under the part 121 or 135's DOT testing program. Upon request, the POI will annotate the Letter of Authorization (LOA) for the air tour operation. The operator must contact the FAA's Drug Abatement Division and advise of the combined program. Contact the Drug Abatement Division directly at [drugabatement@faa.gov](mailto:drugabatement@faa.gov) or (202) 267-8442.

If a Management Information System (MIS) report is required, the operator should submit the report under the part 121 or 135 operation once a combined program is established.

Please direct any questions to the FAA's Drug Abatement Division.
